Special Issue: Stochastic Models of Flow and Transport in Multiple-Scale Heterogeneous Porous Media

Preface

Introduction: Stochastic Models of Flow and Transport in Multiple-scale Heterogeneous Porous Media
A. Guadagnini and C. L. Winter 1

Research Papers

Nonlinear spectral analysis of flow through porous media with isotropic lognormal hydraulic conductivity
D. Veneziano and A. Tabaei 4

Stochastic analysis of saturated–unsaturated flow in heterogeneous media by combining Karhunen-Loeve expansion and perturbation method
J. Yang, D. Zhang and Z. Lu 18

Transmissivity and head covariances for flow in highly heterogeneous aquifers
G. Dagan, A. Fiori and I. Janković 39

Probabilistic reconstruction of geologic facies
L. Guadagnini, A. Guadagnini and D. M. Tartakovsky 57

Transport in heterogeneous sediments with multimodal conductivity and hierarchical organization across scales
Z. Dai, R. W. Ritzi Jr., C. Huang, Y. N. Rubin and D. F. Dominic 68

Joint estimation of transmissivities and recharges—application: stochastic characterization of well capture zones
H.-J. H. Franssen, F. Stauffer and W. Kinzelbach 87

Comparison of genesis and geostatistical methods for characterizing the heterogeneity of alluvial media: Groundwater flow and transport simulations
V. Teles, F. Delay and G. de Marsily 103

Tracer tests for the investigation of heterogeneous porous media and stochastic modelling of flow and transport—a review of some recent developments
T. Ptak, M. Piepenbrink and E. Martac 122

On the striking similarity between the moments of breakthrough curves for a heterogeneous medium and a homogeneous medium with a matrix diffusion term
X. Sánchez-Vila and J. Carrera 164

Runoff generation in karst catchments: multifractal analysis
B. Majone, A. Bellin and A. Borsato 176

Laboratory tracer tests on three-dimensional reconstructed heterogeneous porous media
C. Danquigny, P. Ackerer and J. P. Carlier 196

Vol. 294, No. 4 **July 20, 2004**

Research Papers

The influence of river discharge on tidal damping in alluvial estuaries
A. C. Horrevoets, H. H. G. Savenije, J. N. Schuurman and S. Graas 213

Soil erosion due to rainfall impact with no inflow: a numerical solution with spatial and temporal effects of sediment settling velocity characteristics
W. L. Hogarth, C. W. Rose, J. Y. Parlange, G. C. Sander and G. Carey 229

Using remote sensing to regionalize local precipitation recharge rates obtained from the Chloride Method
P. Brunner, P. Bauer, M. Eugster and W. Kinzelbach 241

Including prior information in the estimation of effective soil parameters in unsaturated zone modelling
J. Mertens, H. Madsen, L. Feyen, D. Jacques and J. Feyen 251

Controls on the chemical and isotopic compositions of urban stormwater in a semiarid zone
L. Asaf, R. Nativ, D. Shain, M. Hassan and S. Geyer 270

Erratum

Erratum to "Infiltration excess at the Horton Hydrology Laboratory (or not?)" [Journal of Hydrology 293 (2004) 219–234]
K. Beven 294
